Art Unit: 1761

This action is non-final as the declaration submitted October 4, 2002 is specifically addressed in this Office Action.

It is noted that this application contains claims 7, 8, and 17 which are drawn to an invention nonelected with traverse in Paper Nos. 5 and 9.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 6, 9-16, 18, and 19 are rejected under 35 U.S.C. 102(e) as anticipated by or,

Art Unit: 1761

in the alternative, under 35 U.S.C. 103(a) as obvious over Rosenplenter for the reasons set forth in rejecting the claims in the last Office action (Paper No. 23). The amendments to the claims are not seen to influence the conclusion of unpatentability previously set forth.

Rosenplenter discloses a sugar-free hard coated chewing gum wherein the coating comprises sorbitol and erythritol in the amounts claimed, and the coating is applied 1-100 times (see entire patent). This is the same as is claimed.

The claims appear to differ as to the closeness to the core and homogeneity of the layer.

These limitations are seen to be no more than inherent and/or obvious to that of Rosenplenter as the same components are used.

The recitation that the product is made by a new process, if the process were indeed new and patentable, does not render an otherwise unpatentable product new and patentable. It is pointed out that claims 1-3, 6, 9-16, 18, and 19 are product claims and not process claims. The product must stand on its own invention, independently of the process of producing same. See *In re Marosi*, 218 USPQ 195; *In re Thorpe*, 227 USPQ 964; *Ex parte Jungfer*, 18 USPQ 2nd 1976.

Applicant's arguments filed March 17, 2003 have been fully considered but they are not persuasive.

The declaration submitted October 4, 2002 is not persuasive for the following reasons.

- 1) The showing is not commensurate in scope with the claims. Applicant broadly claims sorbitol and 1% to 50% w/w erythritol whereas the showing is specific for a 60/40 sorbitol/erythritol.

Art Unit: 1761

- 2) There is no objective data or data analysis to support Applicant's conclusions.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Serpelloni et al and Greenberg et al are cited as teaching coatings containing erythritol and sorbitol (see entire patents).

All of the claim limitations and arguments have been considered. None of them are seen as serving as basis for patentability.

No claim is allowed.
